

# CNT 4714 – Project 1 – Spring 2021

**Title:** “Program Assignment 1: Event-Driven Programming”

**Points:** 100 points

**Due Date:** **Sunday January 31, 2021 by 11:59 pm (WebCourses time)**

## Objectives:

1. To refresh your basic Java skills.
2. To practice event-driven programming using Java-based GUIs.
3. To simulate (albeit at a very high-level) an enterprise application.

**Description:** Develop a Java program that creates a standalone GUI application that simulates an e-store (we’ll call our store Nile Dot Com... we’re not quite as big as Amazon.com!)<sup>1</sup> which allows the user to add in stock items to a shopping cart and once all items are included, total all costs (including tax), produces an invoice, and appends a transaction log file.

Your program development must include the following steps:

1. Create a main GUI containing the following components:
  - a. An area that allows the user to input data into the application along with the descriptive text that describes each input area.
  - b. A total of six buttons as shown below with functionality as described below.
  - c. As illustrated below, the various buttons on the interface are only accessible at certain points during a user’s interaction with the e-store.
2. An input file named “`inventory.txt`”. This is a comma separated file which contains the data that will be read by the application when the user makes a selection. Each line in this file contains four entries; an item id (a string), a quoted string containing the description of the item, in stock status (a string), and the unit price for one of the item (a double). A sample file is provided for you on WebCourses. Feel free to create your own input file for testing purposes or augment the provided input file.
3. An output file (append only) named “`transactions.txt`” must be created that uniquely logs each user transaction with the e-store. The unique transaction id will be generated as a permutation of the date/time string when the transaction occurred (see below).

## Restrictions:

Your source file shall begin with comments containing the following information:

```
/* Name: <your name goes here>  
   Course: CNT 4714 – Spring 2021  
   Assignment title: Project 1 – Event-driven Enterprise Simulation  
   Date: Sunday January 31, 2021  
*/
```

**Input Specification:** The file “`inventory.txt`” as described above (see example below as well).

---

<sup>1</sup> Source = <https://www.wonderslist.com/top-10-largest-rivers/>

**Output Specification:** Output is to appear in the specified components of the GUI and various message boxes that appear, plus the contents of the "transactions.txt" log file that will be generated.

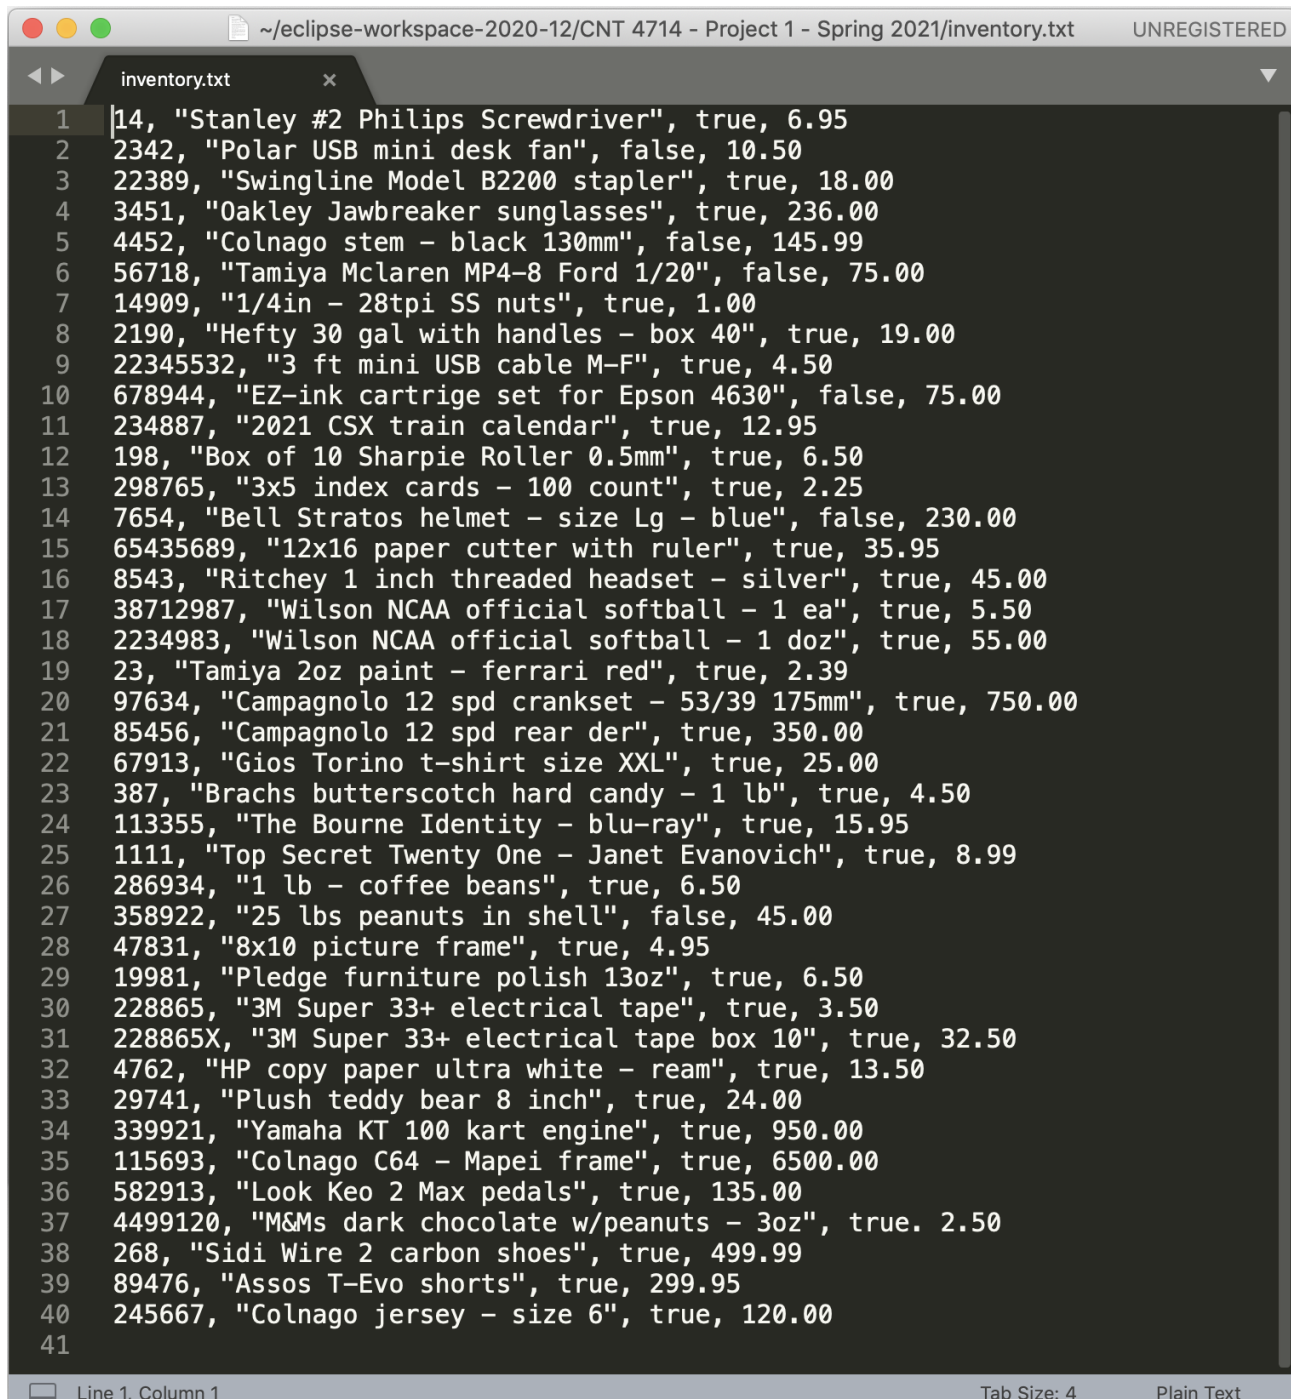

**Deliverables:**

- (1) Submit a working copy of your source code (all .java files), including your inventory.txt file, via WebCourses no later than 11:59pm Sunday January 31, 2021.
- (2) Include a file that contains screen shots, similar to those illustrated below, that shows your application in action as a user interacts with your e-store to purchase items.
- (3) Include a screen shot of your "transactions.txt" file showing at least the last few transactions (similar to the one shown on the last page of this document). There should be a minimum of five different transactions represented in the transaction file.
- (4) You can zip all of the above into a single folder.

**Additional Information:**

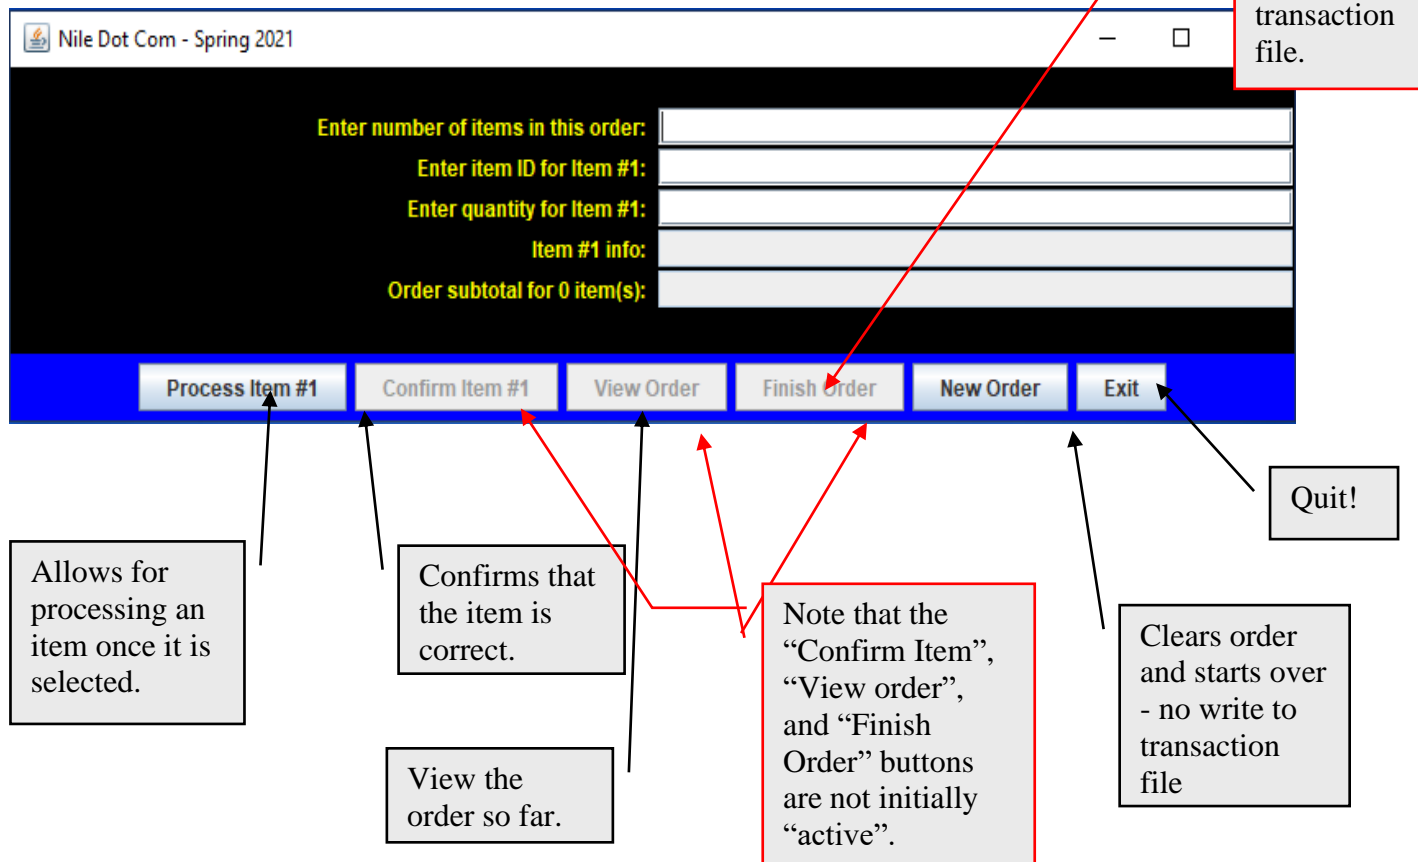

Shown below are example screen shots of the GUI to help illustrate how your application is to operate.

1. Screen shot of the contents of an example "inventory.txt" file.

```
1 14, "Stanley #2 Philips Screwdriver", true, 6.95

40 245667, "Colnago jersey - size 6", true, 120.00
41
```

## 2. Initial GUI:

The initial GUI of the application is titled "Nile Dot Com - Spring 2021". It features a black background with yellow text for labels and a blue bar at the bottom for buttons. The labels and their corresponding input fields are:

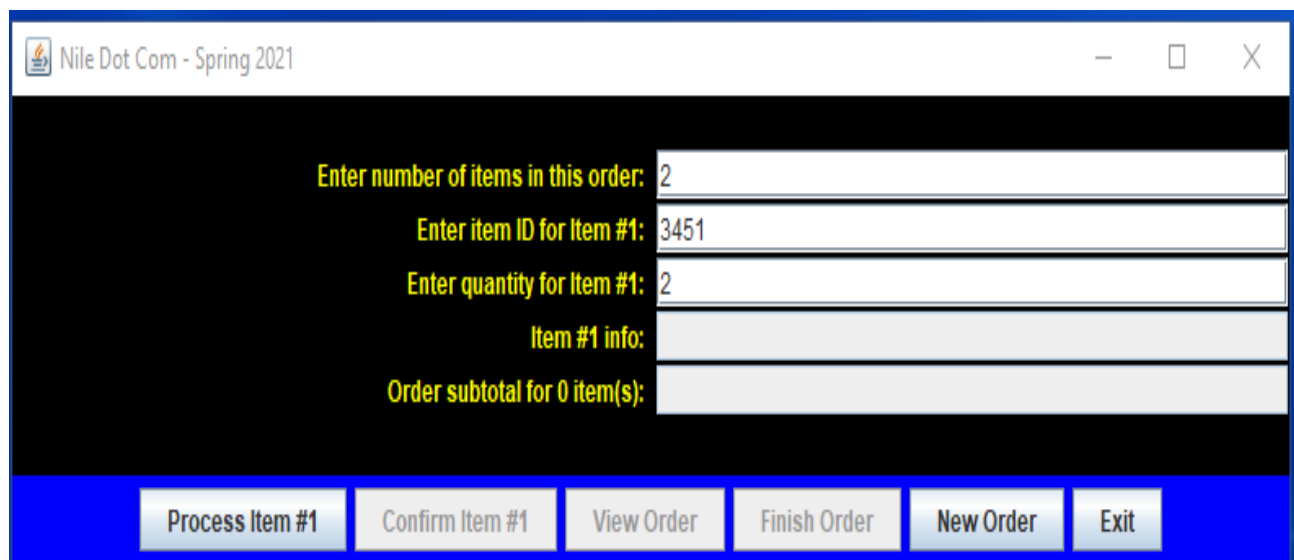

- Enter number of items in this order: [input field]
- Enter item ID for Item #1: [input field]
- Enter quantity for Item #1: [input field]
- Item #1 info: [input field]
- Order subtotal for 0 item(s): [input field]

The blue bar at the bottom contains the following buttons: "Process Item #1", "Confirm Item #1", "View Order", "Finish Order", "New Order", and "Exit".

Annotations and their corresponding buttons:

- "Allows for processing an item once it is selected." points to "Process Item #1".
- "Confirms that the item is correct." points to "Confirm Item #1".
- "View the order so far." points to "View Order".
- "Note that the 'Confirm Item', 'View order', and 'Finish Order' buttons are not initially 'active'." points to "Confirm Item #1", "View Order", and "Finish Order".
- "Clears order and starts over - no write to transaction file" points to "New Order".
- "Quit!" points to "Exit".
- "Completes an order – generates invoice and adds to the transaction file." points to "Finish Order".

## 3. GUI after user specifies total number of items in the order and makes a selection for item #1, but before clicking the "Process Item" button.

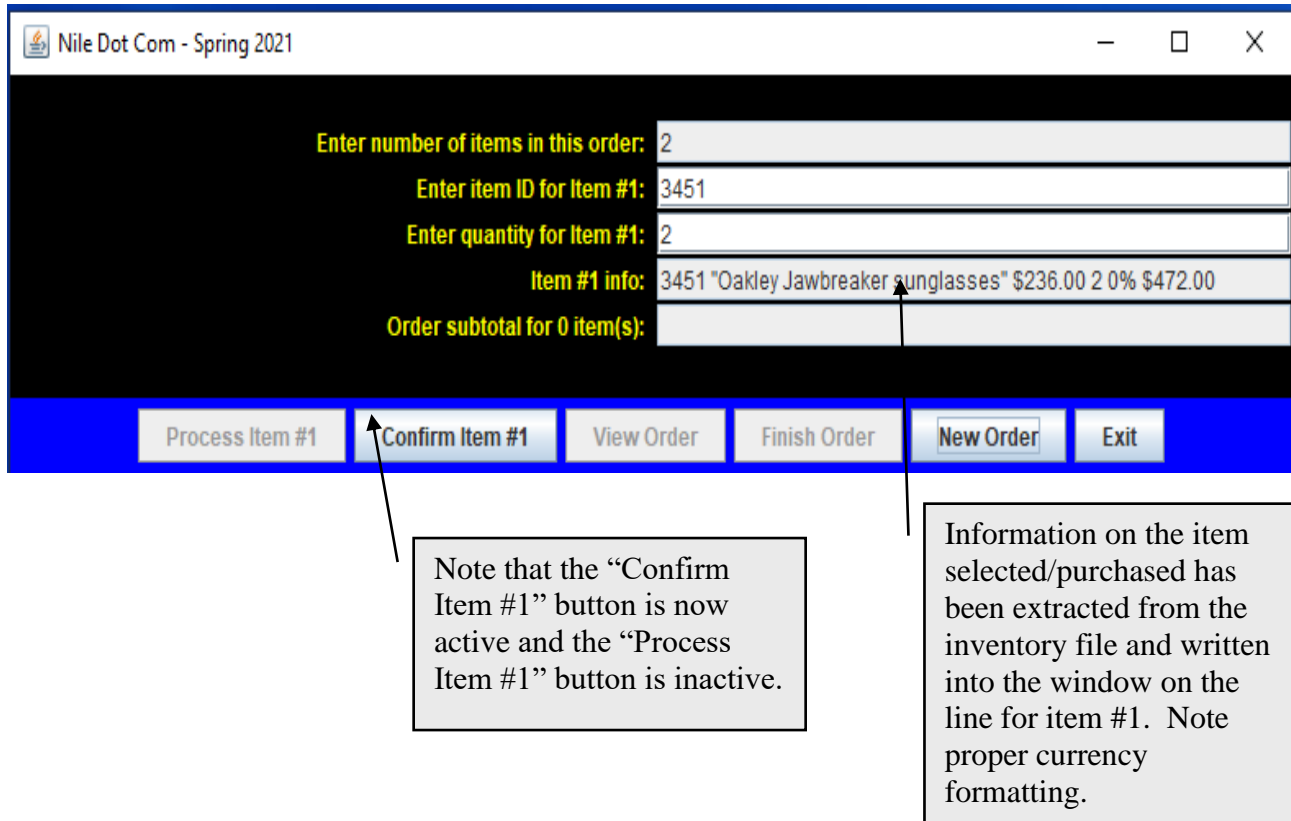

The GUI after user input shows the following values in the input fields:

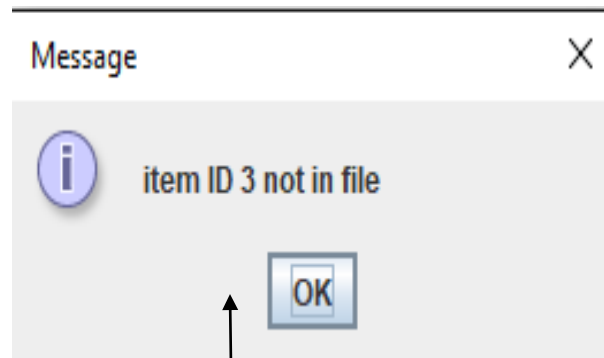

- Enter number of items in this order: 2
- Enter item ID for Item #1: 3451
- Enter quantity for Item #1: 2
- Item #1 info: [empty]
- Order subtotal for 0 item(s): [empty]

The buttons at the bottom remain the same: "Process Item #1", "Confirm Item #1", "View Order", "Finish Order", "New Order", and "Exit".

4. GUI after user has selected the first item and clicked the “Process Item #1” button.

5. When the user clicks on the “Confirm Item #1” button, a confirmation information message appears on the screen.

User entered an incorrect item ID. This message would be displayed when user pressed the Process Item button. This is the only “error” you will need to catch.

6. The main GUI after the user has confirmed the first item.

**Nile Dot Com - Spring 2021**

Enter number of items in this order: 2

Enter item ID for Item #2:

Enter quantity for Item #2:

Item #1 info: 3451 "Oakley Jawbreaker sunglasses" \$236.00 2 0% \$472.00

Order subtotal for 1 item(s): \$472.00

Buttons: Process Item #2, Confirm Item #2, View Order, Finish Order, New Order, Exit

**Discount is based on the quantity of a item. If:**  
1-4 = 0%  
5-9 = 10%  
10-14 = 15%  
≥15 = 20%

Note that the buttons change number.

Note that the text areas for entering the second item information are cleared and ready for input.

Subtotal should reflect current total of all confirmed items.

Information for previous item remains on display.

7. User enters and processes (but has not yet confirmed) the next item in the order (which is the last one for this order).

**Nile Dot Com - Spring 2021**

Enter number of items in this order: 2

Enter item ID for Item #2: 23

Enter quantity for Item #2: 5

Item #2 info: 23 "Tamiya 2oz paint - ferrari red" \$2.39 5 10% \$10.76

Order subtotal for 1 item(s): \$472.00

Buttons: Process Item #2, Confirm Item #2, View Order, Finish Order, New Order, Exit

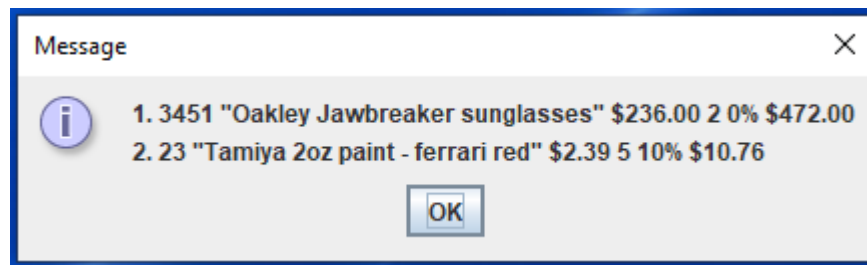

8. The GUI after the user has entered the information for all the items and confirmed the last item.

The screenshot shows a window titled "Nile Dot Com - Spring 2021". The main area has a black background with yellow text. It displays the following information:

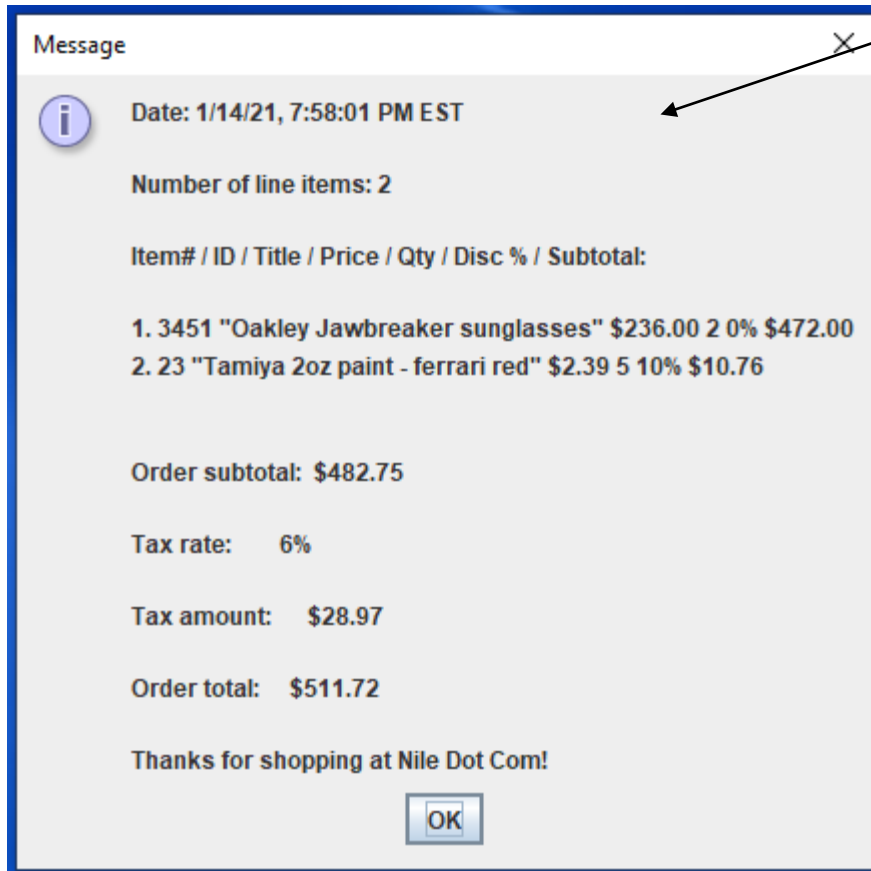

- Number of items in this order:** 2
- Item #2 info:** 23 "Tamiya 2oz paint - ferrari red" \$2.39 5 10% \$10.76
- Order subtotal for 2 item(s):** \$482.75

At the bottom, there is a blue bar containing six buttons: "Process Item", "Confirm Item", "View Order", "Finish Order", "New Order", and "Exit".

9. When the user clicks the “View Order” button, the following message box should appear.

10. When the user clicks the “Finish Order” button, the invoice message should be generated and displayed.

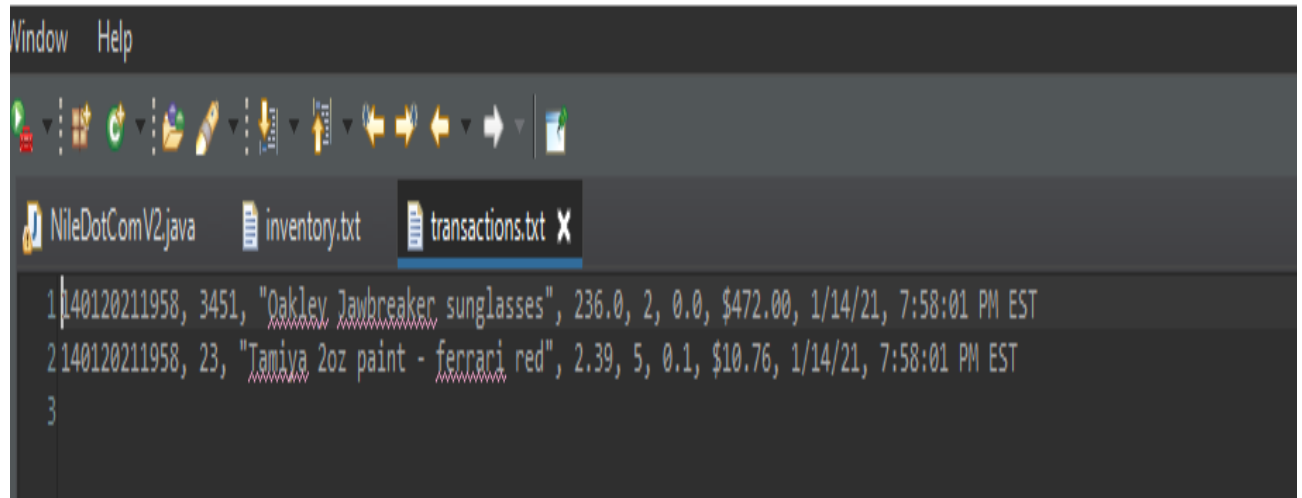

The date and time are used to create the unique transaction id in the “transactions.txt” file. For the invoice the format is “DD/MM/YY HH:MM:SS TMZ”

11. The transaction file after order shown above was finished. Note the unique transaction ids based on the date and time.

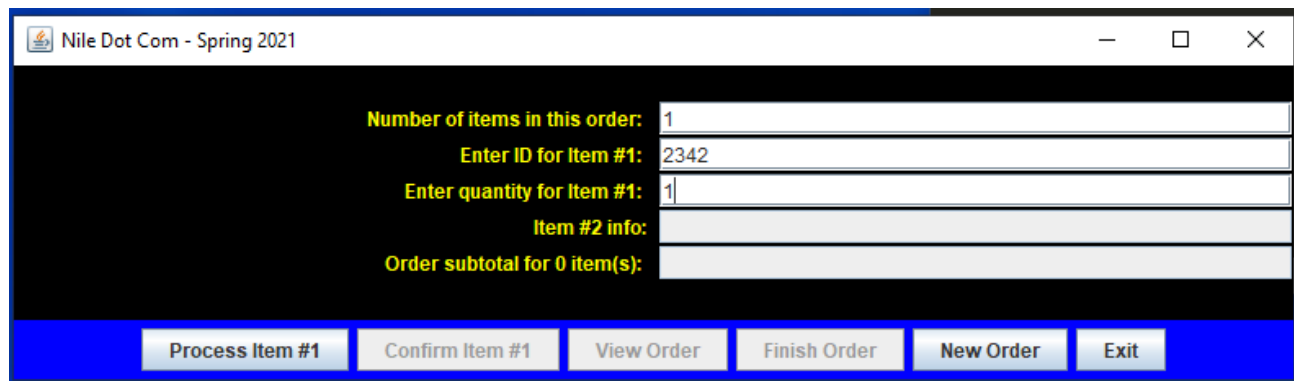

/transactions.txt - Eclipse IDE

The screenshot shows the Eclipse IDE interface with the 'transactions.txt' file open. The file contains two lines of transaction data, each starting with a unique ID based on the date and time (140120211958). The first line describes 'Oakley Jawbreaker sunglasses' with a price of \$472.00. The second line describes 'Tamiya 2oz paint - ferrari red' with a price of \$10.76. The third line is empty.

```
1 140120211958, 3451, "Oakley Jawbreaker sunglasses", 236.0, 2, 0.0, $472.00, 1/14/21, 7:58:01 PM EST
2 140120211958, 23, "Tamiya 2oz paint - ferrari red", 2.39, 5, 0.1, $10.76, 1/14/21, 7:58:01 PM EST
3
```

12. If the user enters an item number for an item that is not in stock, the following message will appear. The user must then enter a new item number for an in-stock item to continue processing the current transaction.

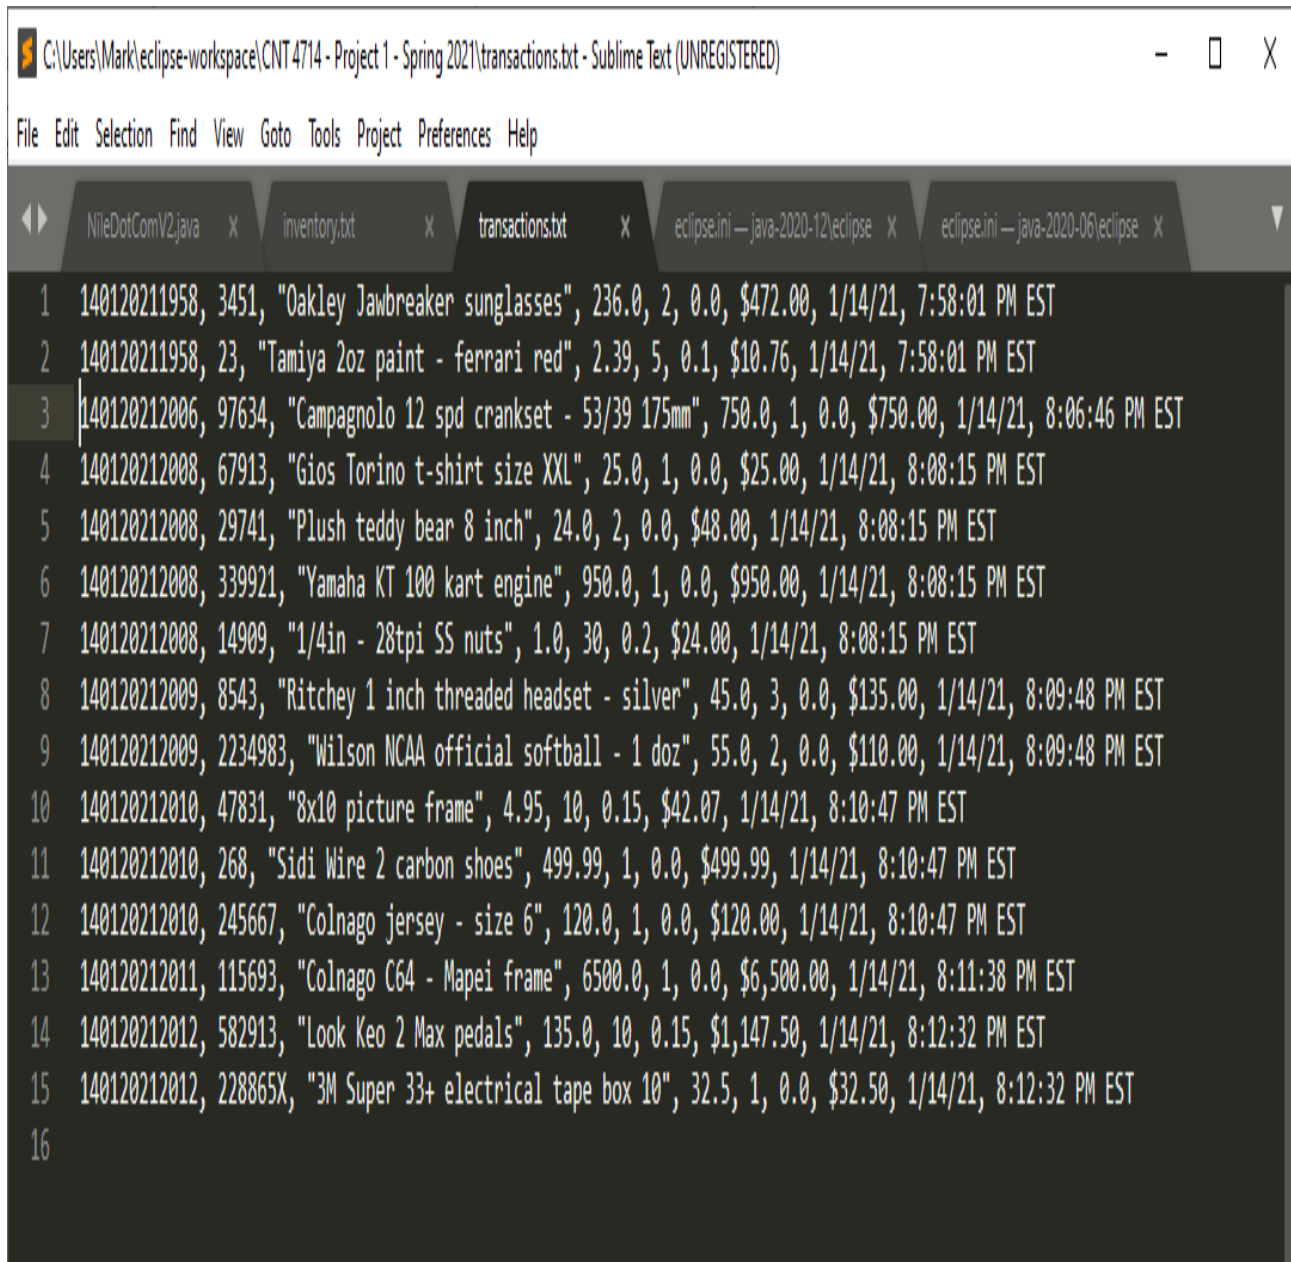

The screenshot shows the 'Nile Dot Com - Spring 2021' application window. It features a form with the following fields and values:

- Number of items in this order: 1
- Enter ID for Item #1: 2342
- Enter quantity for Item #1: 1
- Item #2 info: (empty)
- Order subtotal for 0 item(s): (empty)

At the bottom of the window, there are six buttons: 'Process Item #1', 'Confirm Item #1', 'View Order', 'Finish Order', 'New Order', and 'Exit'.

13. The transaction file after several orders have been completed. Note the unique transaction ids based on the date and time for every separate transaction. This file shows seven separate transactions.

```
1 140120211958, 3451, "Oakley Jawbreaker sunglasses", 236.0, 2, 0.0, $472.00, 1/14/21, 7:58:01 PM EST
2 140120211958, 23, "Tamiya 2oz paint - ferrari red", 2.39, 5, 0.1, $10.76, 1/14/21, 7:58:01 PM EST
3 140120212006, 97634, "Campagnolo 12 spd crankset - 53/39 175mm", 750.0, 1, 0.0, $750.00, 1/14/21, 8:06:46 PM EST
4 140120212008, 67913, "Gios Torino t-shirt size XXL", 25.0, 1, 0.0, $25.00, 1/14/21, 8:08:15 PM EST
5 140120212008, 29741, "Plush teddy bear 8 inch", 24.0, 2, 0.0, $48.00, 1/14/21, 8:08:15 PM EST
6 140120212008, 339921, "Yamaha KT 100 kart engine", 950.0, 1, 0.0, $950.00, 1/14/21, 8:08:15 PM EST
7 140120212008, 14909, "1/4in - 28tpi SS nuts", 1.0, 30, 0.2, $24.00, 1/14/21, 8:08:15 PM EST
8 140120212009, 8543, "Ritchey 1 inch threaded headset - silver", 45.0, 3, 0.0, $135.00, 1/14/21, 8:09:48 PM EST
9 140120212009, 2234983, "Wilson NCAA official softball - 1 doz", 55.0, 2, 0.0, $110.00, 1/14/21, 8:09:48 PM EST
10 140120212010, 47831, "8x10 picture frame", 4.95, 10, 0.15, $42.07, 1/14/21, 8:10:47 PM EST
11 140120212010, 268, "Sidi Wire 2 carbon shoes", 499.99, 1, 0.0, $499.99, 1/14/21, 8:10:47 PM EST
12 140120212010, 245667, "Colnago jersey - size 6", 120.0, 1, 0.0, $120.00, 1/14/21, 8:10:47 PM EST
13 140120212011, 115693, "Colnago C64 - Mapei frame", 6500.0, 1, 0.0, $6,500.00, 1/14/21, 8:11:38 PM EST
14 140120212012, 582913, "Look Keo 2 Max pedals", 135.0, 10, 0.15, $1,147.50, 1/14/21, 8:12:32 PM EST
15 140120212012, 228865X, "3M Super 33+ electrical tape box 10", 32.5, 1, 0.0, $32.50, 1/14/21, 8:12:32 PM EST
